Astra Canyon

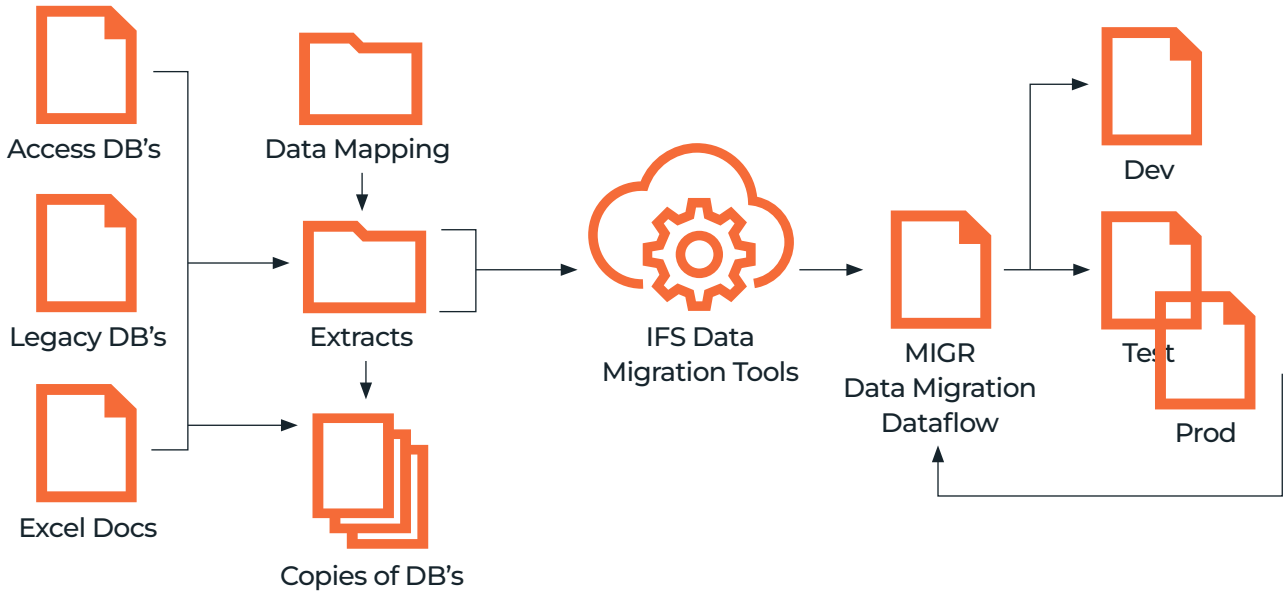
Migration Toolkit

Migration Toolkit for IFS Cloud
Effortless Migration with Precision

Seamless integration across environments

MTK supports a wide range of environments including IFS Cloud, private datacenters, and on-premise setups. Whether you're migrating data for the first time or looking to streamline existing systems, MTK integrates directly within Aurena, eliminating the need for external applications.

Data Migration Process



Migration Toolkit

Comprehensive Functionality

- Supports over 40 functional areas, including customer data, parts orders, and on-hand quantities.
- Designed to handle migrations from small datasets to hundreds of millions of rows, ensuring flexibility and scalability.
- Offers static and dynamic data migration, adaptable to diverse business needs.

User Friendly & Efficient

- Empower your team with a tool that non-technical users can operate after the initial migration pass.
- Features an intuitive advisor and exception system, highlighting issues before they impact your migration timeline.

Built-In Optimization & Documentation

- Predefined field-level mapping documentation and process management streamline the migration journey from kick-off to go-live.
- Includes translation capabilities for data consistency without the need for manual script adjustments.

Expert Support & Ongoing Development

- Benefit from a dedicated team with over 15 years of IFS migration expertise, providing tailored solutions for new and existing implementations.
- Continuous updates ensure compatibility with the latest IFS Cloud releases, backed by a responsive support center for enhancements and fixes.

End-to-End Services Tailored for Success

Astra Canyon's migration services encompass every step, from planning to post-migration support, ensuring a smooth and successful transition for all IFS Cloud users.
